Technical Skills

Programming Languages

- Python
- Java
- C++
- JavaScript
- C

Technologies

- HTML
- CSS
- React
- Tailwind CSS
- Flask
- Node
- Flutter

Databases & Tools

- MySQL
- PostgreSQL
- MongoDB
- Cloudinary
- Supabase
- Firebase
- Git & Github
- Matlab

Artificial Intelligence

- Machine Learning
- Deep Learning
- Reinforcement Learning
- Generative AI

Interests

- Natural Language Processing
- Music and Speech Processing

Publications

AI-Driven cybersecurity Framework For Anomaly Detection in Power System [Springer Scientific Reports](#)

An AI-driven cybersecurity framework for smart grids that fuses cyber-physical data to detect advanced attacks in real time with up to 99.8% accuracy and edge-deployable performance.

SUMMARY

Versatile Full Stack Developer and AI Engineer proficient in Python, Java, and C++, specializing in building scalable, user-centric intelligent systems. Passionate about bridging the gap between complex AI research and practical, high-impact digital products through continuous innovation and robust software architecture.

EXPERIENCE

InCTF - 2026

Web Designer

Amrita Vishwa Vidyapeetham, Kerala

2026

- **Amrita InCTF 2026:** A national-level operation to recruit, train, and evaluate elite cyber defense personnel through real-world threat analysis and system security.

PROJECTS

Agri AI | *Python* | [GitHub](#)

- Agri-AI is a Flask-based backend API that provides an agriculture assistant chatbot powered by Google Gemini, along with crop information and sample order-tracking endpoints.

SoulSync | *Dart, C++, CMake, Swift, Ruby, JavaScript, Python* | [GitHub](#)

- SoulSync is an AI-powered multimodal music platform that leverages facial and vocal emotion detection to deliver deeply personalized, mood-resonant listening experiences.

Focus Dragon App | *Dart, HTML, Kotlin* | [GitHub](#)

- A mobile app focused on improving user concentration and healthy phone usage through guided focus sessions, a gamified "dragon" companion, insights, and productivity tools.

Genz Chat | *TypeScript* | [GitHub](#)

- GenZ Chat is a real-time web-based chat application designed for modern users with secure, scalable, and interactive communication features.

Secure File Management System | *C, CMake, Makefile* | [GitHub](#)

- A system that can lock and unlock files using a 16-bit XOR encryption key, thereby preventing unauthorised access to confidential file data.

Intelligent Multi Agent Planning and Search System | *Python* | [GitHub](#)

- Developed a multi-agent reinforcement learning framework using Soft Actor-Critic (SAC) to optimize autonomous navigation and cooperative search-and-rescue.

Open-Self | *HTML, CSS, JavaScript* | [GitHub](#)

- OpenShelf is a modern, frictionless library management system designed for educational institutions. The system provides a seamless experience for students to discover and reserve books

LEADERSHIP & VOLUNTEERING

Technical Member – INIT Club

Amrita Vishwa Vidyapeetham

2025-26

Coimbatore, Tamil Nadu

- Web Development Team member

Media – Team Media & IETE Student Forum

Amrita Vishwa Vidyapeetham

2024-25

Coimbatore, Tamil Nadu

- One of photographer and videographer for the club.
